

AIM GLOBAL EDUCATION SOCIETY is one of the leading Organisation in Education Industry. AIM are in tune with the latest trends in the IT industry, thus setting the highest standards of IT education for the students. AIM provides learners with one of the most comprehensive, yet extended range of training options, with something virtually for every segment of society. In line with its vision of bringing people and computers together, AIM has built up a broad portfolio of computer training programs-from simple, short term courses for first time users, to advanced, high tech offerings for IT professionals, looking at re-skilling or upgrading their knowledge in IT.

The company's unique, proven methodologies governing course-ware, education delivery and extensive footprint in India, enable people from all parts of the country to gain and access high quality education in IT with an edge in the competitive training market. The AIM umbrella of courses covers almost every type of audience. Whether it's a professional seeking to advance his knowledge for improving prospects at work, a student planning a career in IT or intending to use IT in his career, or a housewife / Sr. Citizen wanting to learn to send e-mail, AIM has something for everyone. Apart from IT professionals, AIM is now also focusing on creating skilled people for the IT-enabled services (ITES) / BPO market, an emerging opportunity for job seekers. The company's move into the IT-assisted education space takes the AIM brand into new market segments, enabling it to touch the lives of millions of young people the world over. AIM has also tied up with leading educational institutions across the GLOBE, to bridge the gap between the formal and non-formal learning environments.
