DCA full form is Diploma in Computer Application. It is a one-year diploma program in the field of computer applications that includes the study of a variety of software programs, including HTML, MS Office, Internet Applications, and operating systems.

As per eligibility criteria for the DCA course, candidates must have completed high school from a recognized board with at least 40% marks. The DCA computer course covers subjects like basic Computer Skills, MS Office Applications, Internet Basics, E-Business, PC Assembly, and Troubleshooting, etc.

DCA course fees can be anywhere between INR 5,000 and INR 30,000. One can pursue further education in a similar sector or find DCA course job opport in a field like accounting, database handling, fundamental computer applications, software development, computer operator, etc. The average salary after the DCA computer course range between INR 2 to 5 lakhs.

Students can also choose from a variety of computer application programs offered in India, such as the BCA program, which provides even higher professional prospects. BBA Computer Applications, BSc Computer Applications, and BA Computer Applications are other categories of computer application courses offered in India.
